

THOMAS ELECTRONICS

OF AUSTRALIA PTY. LTD.

Thomas Electronics is an established, Australian company specialising in the development, manufacture and support of display systems. Beginning as a manufacturer of cathode ray tubes in 1956, Thomas has developed into an industry leader providing, end-to-end display solutions to customers around the world.

The innovative avionic display unit overhaul service provides a unique cost effective capability to the world air transport industry. Thomas Electronics is also the largest repairer of IT monitors and peripherals in the Southern Hemisphere. The

Display Engineering business unit provides defence forces and other customers with high-performance display solutions, including specialist display units for training and simulation.

With the success achieved through the avionics and IT support, Thomas Electronics has gained wide recognition as a developing exporter, being named the winner of 2001 & 2002 Western Sydney Industry Awards for Outstanding Export Achievement by a small / medium size enterprise, and finalist for 2003. Thomas was also recognised as the Emerging Exporter winner in 2002 Premiers NSW Exporter of the Year awards and was National Finalist in the Aus Industry Emerging Exporter Award.

Thomas Electronics exemplifies the "can-do" attitude of Australian SME's contributing to Australia's future economic success.
